AirMan® technology is the most trusted Tire Repair solution by the leading automotive manufacturers.

Which AirMan is for you?

Here are just a few manufacturers that trust our brand.

Mercedes-Benz

airMAN[®] ResQ

TIRE REPAIR KIT SERIES

A tire repair kit or system consists of a high pressure inflator and a tire repair fluid called a sealant used. The combination of both in a unit enables users to inflate flat tires and repair puncture tires. The compressor in this unit not only inflates but also directly pumps the sealant into the tire enabling the driver to drive to the closest garage for a permanent repair. Today, tire repair kits of quality such as AirMan (under Active Tools label) are being deployed by automotive manufacturers replacing traditional heavy and bulky spare tires.
